

BIONET-PM

WORKSHOP 3D DISEASE MODELS: FROM BIOMEDICAL RESEARCH TO PERSONALIZED MEDICINE

Discover how organoids, organ-on-chip systems, 3D cultures, and co-culture models are transforming disease research and driving the development of innovative therapies. Join us for an afternoon of talks and discussions exploring the frontiers of biomedical research and the future of personalized medicine.

Who should attend?

Students, PhD candidates, early-career researchers, and professionals in biomedical and life sciences.

An opportunity to learn, exchange ideas, and network with the biomedical research community

Full program and registration information coming soon
